Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 23-26, 40-42, 44-55, drawn to covering modules, classified in class 52, subclass 506.01.
- II. Claims 17-22, 27-39 and 43, drawn to an anchor sheet, classified in class 52, subclass 698.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The subcombination has separate utility such as a covering by itself or for attaching items other than the modules of Group I.

Because these inventions are distinct for the reasons given above and the complete search required for each Group is not required for the other Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

The examiner would also like to note that several of the claims appear to be exact duplicates of claims in applicant's other related applications/patents. If so, cancellation of these claims would greatly simplify the examination of the application upon applicant's election.
